In India, there are many students who are under graduation or are graduates and are willing to get a job. Most of them wish to get placed in the public sector and they prepare to appear in their exams. The craze of government jobs has been increased as it provides a constant career growth and also provides a secured future. Government jobs vacancies are very limited than the no of seekers so there is a very tough competition one must prepare well to get placed after clearing the government exams. Maths plays a key role in many of the government exams. Few jobs are enlisted below where maths plays a major role.

1) IBPS Clerk Exam

The [Institute of banking personal selection](#) also known as IBPS conduct few banking exams. Every year common written examination is held to recruit clerks in public banks. Syllabus and subjects for this exam are as follows. There are five sections:

1. English Language
2. Reasoning
3. Quantitative Aptitude
4. General Awareness
5. Computer Aptitude

There are five main subjects and one can prepare accordingly and one can also take help from previous year question papers and guide. There are total 190 questions asked in the exam that needs to be completed in 160 minutes. Maths plays a key role in this examination and can help to clear the [sarkari results](#).

Guidance and Preparation Tips.

- One should make a daily study routine
- Go through previous year question papers and guide books
- Must update yourself with daily current affairs.

2) Railway Jobs

Railway jobs are one of the most popular government jobs that recruit candidates every year and provide a great opportunity for the job seekers. There are few vacancies out for railway job interested candidates can apply online and make it through clearing sarkari results. The syllabus for railway jobs is as follows:

1. Arithmetic
2. Reasoning
3. General Science

4. Technical ability
5. General awareness
6. General intelligence

Candidates who wish to appear in railway exams must prepare according to the syllabus so that they can score good marks and they should also focus their maths as major part of the questions comprises of maths. Total no of question asked in the exams are 120 which are of 120 marks and the time duration of this exam is 90 minutes

Preparation tips for this exam

- Prepare yourself according to the syllabus
- Focus on maths as major part of questions is of maths
- Go through current affairs
- Make your daily study routine

3) Staff Selection Commission (SSC)

[SSC](#) has been one of the most preferred jobs in India. Every year lot of vacancies are filled by SSC in the government department and provide a great path for students to secure their position in the government sector. Staff selection commission conduct test to recruit group c (non-technical) and group b (non-gazette both technical and nontechnical) post in the various department of the government of India. SSC is the organisation which provides employment to millions of students every year in India. It provides great opportunity for students who are looking forward for SSC. Syllabus and subject for the exam is as followed:

1. General Intelligence
2. English Language
3. Quantitative Aptitude
4. General Awareness
5. Computer based examination mode

The written examination consists of total 100 questions and total time duration of 120 minutes and computer based examination consist of physics, computer science and information technology also electronics and telecommunication engineering.

Preparation guide

- One must go through the syllabus and prepare according to that
- One should get help from guide and previous year question papers
- Should prepare a timetable and daily study routine
- Should go through current affairs.

These are the few jobs that everyone wishes to secure their position in these jobs by clearing sarkari results as these jobs have very rapid growth in very less time and provide great future. Those who are willing to get these jobs must be good in maths as in these exams maths is asked in majority. Maths is one

of those subjects that play a key role in clearing the government exams. One should focus on maths and practice it daily so that there is no chance of lagging behind in the exams and get good marks in the government exams.
