

International Mathematical Olympiad 2011

by Gonit Sora - Friday, August 05, 2011

<https://gonitsora.com/international-mathematical-olympiad-2011/>

The International Mathematical Olympiad (IMO) is held every year in July where talented high school students participate in a grueling 9 hour exam spread over two days to tackle some of the most challenging mathematical problems. This year too it was held in Amsterdam where India bagged the 23rd position with a gold medal, 2 silver medals and 2 honorable mentions. The questions asked in this year's IMO can be downloaded [here](#).

We are grateful to Prof. Mangesh B. Rege (North-Eastern Hill University, Shillong) for the question paper.
