

A conversation with Dr. Angela Tabiri, the Ghanaian Maths Queen

by Manjil Saikia - Saturday, June 27, 2020

<https://gonitsora.com/interview-angela-tabiri/>

Dr. Angela Tabiri is at present a Google AI postdoctoral fellow in the [African Institute for Mathematical Sciences](#) in Ghana. Prior to this she did her PhD from the University of Glasgow in 2019 and a Postgraduate Diploma from ICTP, Trieste in 2015. Her research interests are in noncommutative algebra, Hopf algebra, quantum groups and quantum homogenous spaces. She is also leading a unique initiative called Femafriemaths, which promotes STEM education among African females. For all of these and many more reasons, Dr. Tabiri is rightly known as the '*maths queen of Ghana*'.

Gonit Sora's editor Manjil Saikia sat down with Dr. Tabiri to discuss *her journey in mathematics, AIMS Ghana, STEM education in Africa, gender issues in mathematics, her different initiatives and much more*. The full video is available in our [Youtube channel](#) as well as below.
